Introduction

MobiCraft theme is an e-commerce theme specifically made to enhance online Mobile e-commerce store. It provides numerous snippets for you to customize your store with attractive look & feel.

Benefits of MobiCraft Theme

- This theme will beautify the online ecommerce store
- It also provides various snippets to customize the store by giving an attractive look and feel.

Pre-requisites

- Following points must be followed before starting the plug-in installation:
 - You should login as an Admin in Odoo.
 - Check that your Odoo Instance is compatible for MobiCraft Theme.
 - An e-commerce module should be present in your instance to use this theme.

Note: MobiCraft Theme v11's all new features are not available in v8, v9 and v10.

Installation

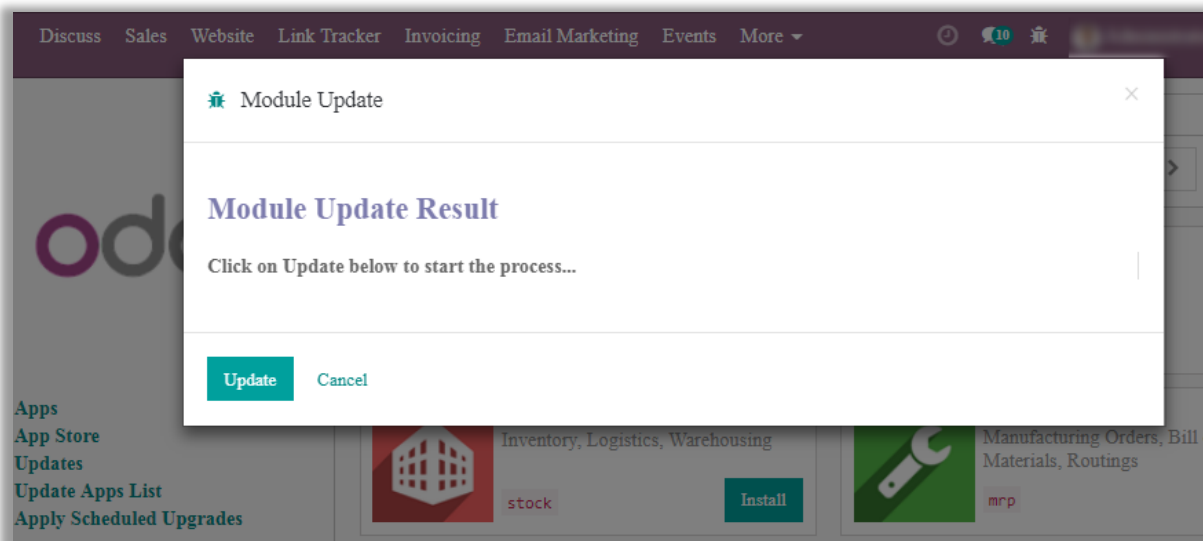

Installation Steps

- Download & extract the zip file.
- Check your Odoo add-ons path.
 - It should be same as defined in Odoo Config file.
 - Config files are mostly saved in /etc folder. For e.g. /etc/odoo.conf
 - **Open Config file:**
 - Give the command: `sudo/etc/odoo.conf`
 - Config file content: `addons_path = /opt/odoo/addons`
- Open Terminal and go to download location
 - For e.g. if the download location path is: /home/odoo/Downloads then the command to be written in the terminal would be: `cd/home/odoo/Downloads`
- Copy download modules to addons path
 - Give the below mentioned commands to perform copy operation:
 - `$cd /home/odoo/Downloads/theme_mobicraft`
 - `$cd v11`
 - `$sudo cp theme_mobicraft /opt/odoo/addons`
- Restart Odoo server
- Login with the admin credentials in your odoo instance.

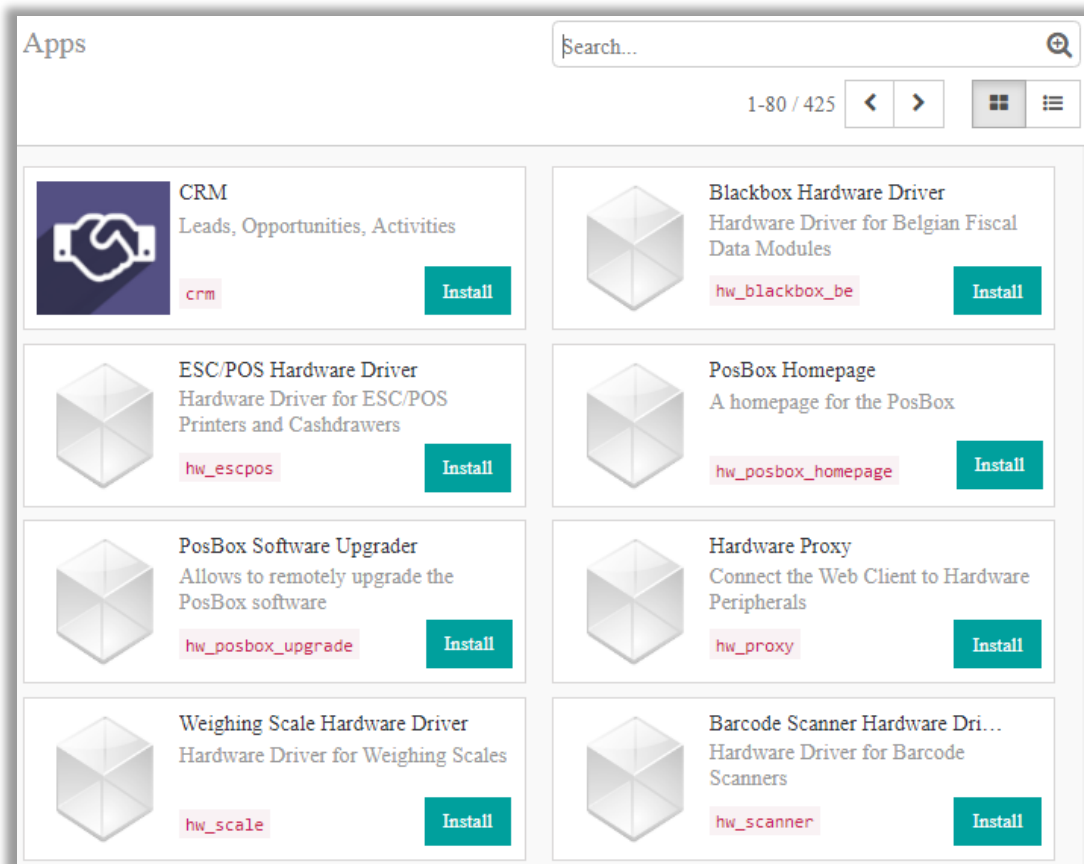

- Activate the Developer Mode
 - To activate Developer Mode, Go to **Settings -> Activate the developer mode (with assets)**. Click on '**Activate the developer mode (with assets)**' and developer mode will be activated.

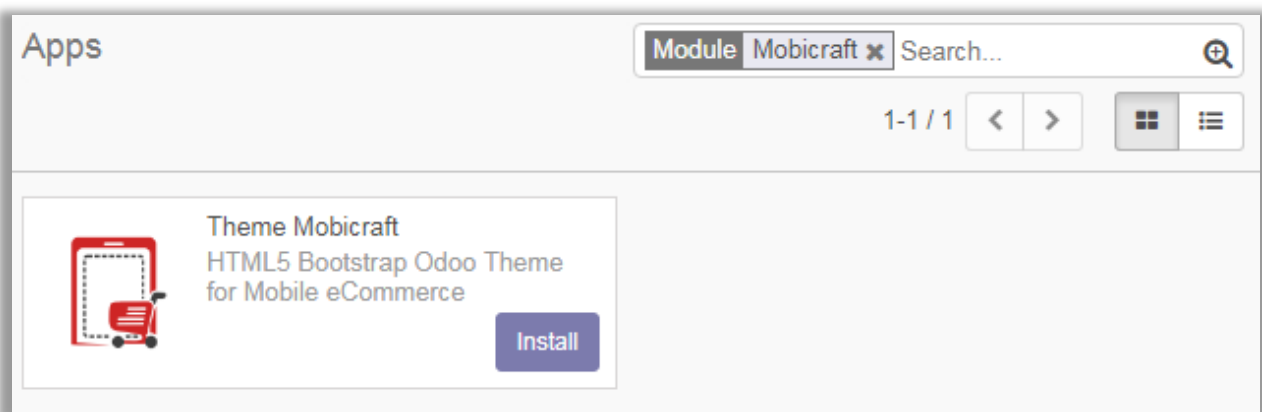

- Go to Settings/Update Apps List.
 - Click on '**Update**' button.

- Go to Settings/Apps
 - Remove search filter

- Enter module name in the search box provided in the top right corner of the page. For e.g. here write "MobiCraft".
- Click on 'Install' button.

Access Rights Management

- Now after installing the theme, to manage the access rights of users go to **Settings -> Manage access rights**.
- By clicking on it you will be redirected to the Users module. Thereafter navigate to the detail page of the particular user for which you want to manage the access rights.
- Now under '**Access Rights**' tab from '**Website**' dropdown list select the '**Editor and Designer**' option to let the particular user modify the '**Slider Configurations**', '**Product Tags**' and '**Product Multiple Images**'.

The screenshot displays the user management interface for a user named Mike. At the top, there is a breadcrumb trail 'Dashboard / Users / Mike' and two buttons: 'Save' and 'Discard'. A pagination indicator shows '2 / 2' with navigation arrows. The user's profile section includes a photo of Mike, his name 'Mike', and his email address 'mike@appjetty.com'. A status indicator shows a green checkmark and the word 'Active'. Below the profile, there are two tabs: 'Access Rights' (selected) and 'Preferences'. The 'Access Rights' tab is titled 'Application Accesses' and features a list of application categories on the left and a corresponding dropdown menu on the right. The categories are: Sales, Accounting & Finance, Employees, Events, Mass Mailing, Website, and Administration. The dropdown menu shows the following options: 'User: Own Documents Only', 'Billing', 'Employee', 'User', an empty option, another empty option, 'Restricted Editor', and 'Editor and Designer' (which is highlighted in blue).

Application	Access
Sales	User: Own Documents Only
Accounting & Finance	Billing
Employees	Employee
Events	User
Mass Mailing	
Website	
Administration	Restricted Editor Editor and Designer

Note: If the '**Restricted Editor**' option is selected user won't be able to edit the '**Slider Configurations**', '**Product Tags**' and '**Product Multiple Images**' options.

How it Works?

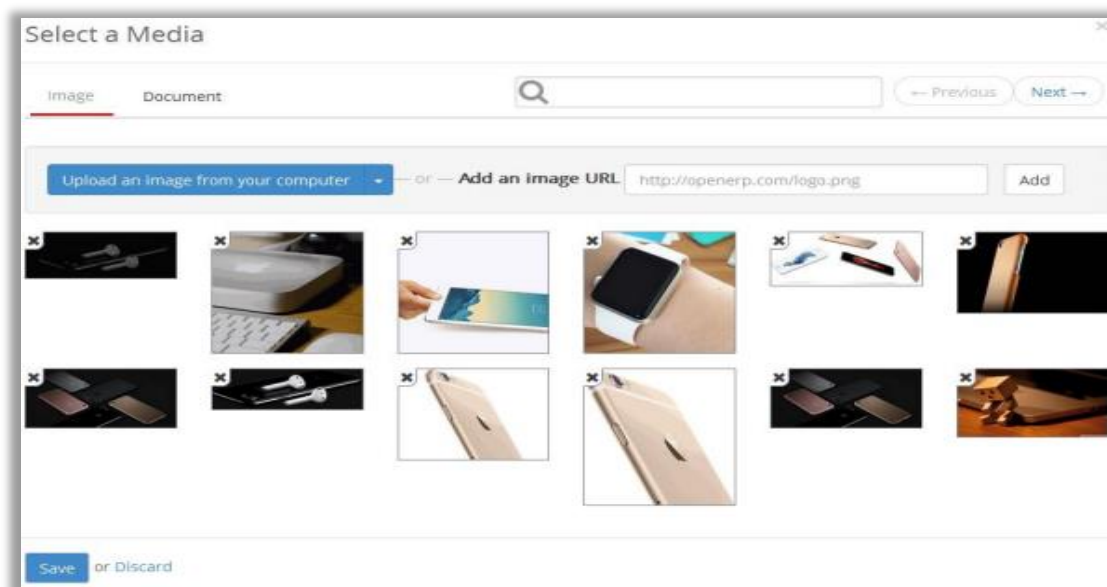

Back-End Configurations

Configuring Home Slider Snippet

- Go to **Website -> Edit -> Insert Blocks -> Home Slider**. Drag and drop Upper Banner Snippet on the page where you want it.
- Click on Customize to customize Style, Background and Color of the snippet. You can Move, Copy and Delete the snippet from here. You can also resize the snippet as per the need.

- You can click on any image to change the image or remove the image. Along with image you can also add Text, Document, Pictogram and Video to the snippet. You can also Manage Slideshow speed along with number of slides in the snippet.

- You can also add text to the banner along with any button that can redirect your customer to any page. You can also manage links of the button by clicking button and then clicking on link button.

Configuring Multi Product Slider Snippet

- Go to **Website -> Edit -> Insert Blocks -> Multi Product Slider**. Drag and drop Multi Product Slider Snippet on the page where you want it.
- Select the Type of slider which you want to display on the page.
- Click on '**Customize**' to customize Style, Background and Color of the snippet. You can Move, Copy and Delete the snippet from here. You can also resize the snippet as per the need.

The image shows a configuration window titled "Multi Product Slider Configuration". It features a "Type" label followed by a dropdown menu currently set to "Trending". At the bottom right, there are two buttons: "Cancel" (blue) and "Apply" (red).

- Add a snippet to your E-Commerce store containing exclusive products from product list.
- From this snippet your customer can directly add product to the cart and can also see ratings of the added product.
- Multi Product Slider snippet supports two different widths:
 - Full Page Width Slider
 - Box Width Slider

Managing Slider Configurations

- Go to Sales -> Slider Configuration -> Multi Product Slider Configuration. Click on 'Create' button to create a new slider category.
- Set following attributes to display Multi Product Slider on website:
 - **Slider Name:** Enter Slider Name.
 - **Auto Rotate Slider:** Enable this to set slider on Auto Rotation.
 - **Slider Sliding Speed:** Manage Slider Speed if set on Auto Rotation.
 - **No. Of Collections to Show:** Number of collections that are displayed on the page.
 - **Collection Name:** Name of the Collection.
 - **Product Collection:** Set products which are to be displayed in the collection.

Configuring Products Slider Snippet

- Go to **Website -> Edit -> Insert Blocks -> Products Slider**. Drag and drop Products Slider Snippet on the page where you want it.
- Select the Type of slider which you want to display on the page.
- Click on '**Customize**' to customize Style, Background and Color of the snippet. You can Move, Copy and Delete the snippet from here. You can also resize the snippet as per the need.

The image shows a configuration window titled "Products Slider Configuration". It features a label "Type" followed by a dropdown menu currently set to "New Products". At the bottom right, there are two buttons: "Cancel" (blue) and "Apply" (red).

- You can add numerous products to the slider and show them to the customers. You need to select product types defined in the back end, the products which are assigned to that category will get displayed in the snippet.

Managing Product Slider Configurations

- Go to **Sales -> Slider Configuration -> Products Slider Configuration**. Click on **'Create'** button to create a new slider category.
- Set following attributes to display Category Slider on website:
 - **Slider Name:** Enter the name of slider.
 - **Counts:** Enter the number of categories to be displayed on the page.
 - **Auto Rotate Slider:** Enable this to set slider on Auto Rotation.
 - **Slider Sliding Speed:** Manage Slider Speed if set on Auto Rotation
 - **Collection of Products:** Add the products which are needed to be added in the collection.

The screenshot shows the 'Product Slider / New' configuration form. At the top, there are 'Save' and 'Discard' buttons. The form contains the following fields:

Field	Value
Slider name	Best Sellers
Active	<input checked="" type="checkbox"/>
Counts	4
Auto Rotate Slider	<input checked="" type="checkbox"/>
Slider sliding speed	5,000
Collections of product	iPhone 7 x, Galaxy Note 8 x

Note: To manage the Slider Configurations user must have the **'Editor and Designer'** access rights.

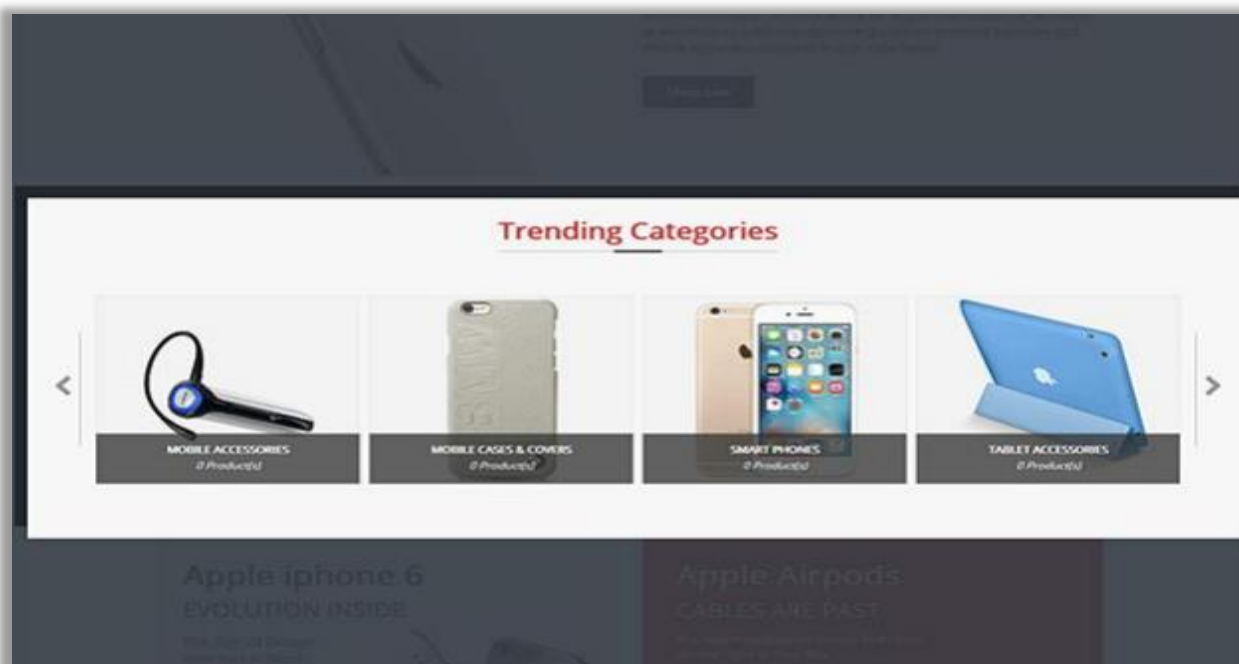

Configuring Category Slider Snippet

- Go to **Website -> Edit -> Insert Blocks -> Category Slider**. Drag and drop Category Slider Snippet on the page where you want it.
- Select the Type of slider which you want to display on the page.
- Click on '**Customize**' to customize Style, Background and Color of the snippet. You can Move, Copy and Delete the snippet from here. You can also resize the snippet as per the need.

The screenshot shows a configuration window titled "Category Slider Configuration". It features a label "Type" followed by a dropdown menu currently set to "Trending Categories". At the bottom right, there are two buttons: "Cancel" (blue) and "Apply" (red).

- Display Trending Categories of your Store with this slider snippet. You can add categories to the slider from back end and name the slider as requirement. Customer will be able to directly navigate to the category from the categories that are on display.

Managing Category Slider Configurations

- Go to **Sales -> Slider Configurations -> Category Slider Configurations**. Click on Create button to create a new slider category.
- Set following attributes to display Category Slider on website:
 - **Slider Name:** Enter Slider Name.
 - **Counts:** Number of Categories to display on the page.
 - **Auto Rotate Slider:** Enable this to set slider on Auto Rotation.
 - **Slider Sliding Speed:** Manage Slider Speed if set on Auto Rotation.
 - **Collection of Category:** Add the categories which are needed to be added in the collection.

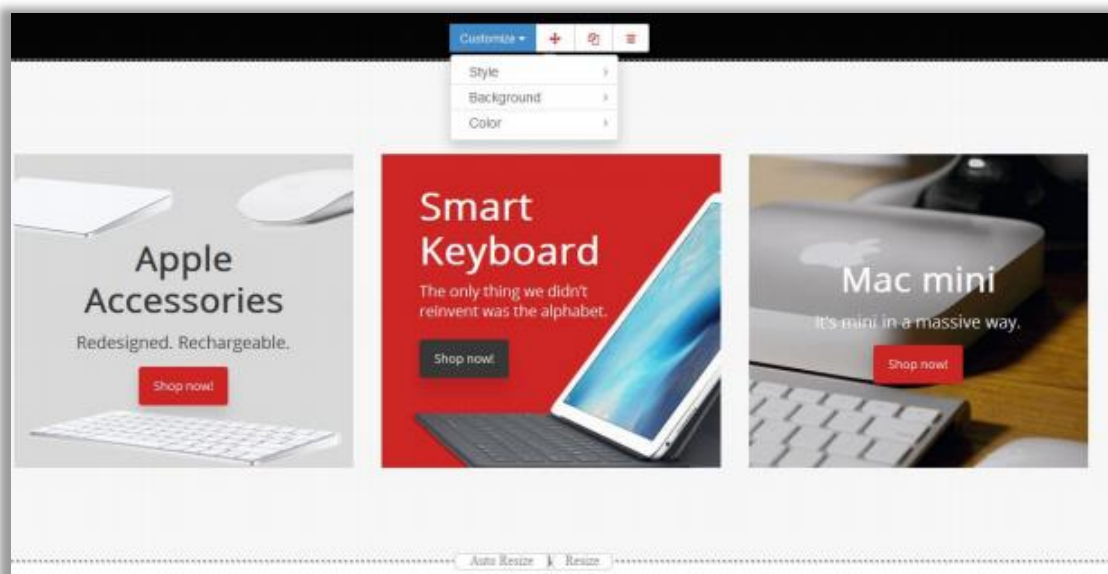

The screenshot shows the 'Category Slider / New' configuration form. At the top, there are 'Save' and 'Discard' buttons. The form contains the following fields:

- Slider name:** A text input field containing 'Trending Categories'.
- Active:** A checkbox that is checked.
- Counts:** A dropdown menu showing the value '4'.
- Auto Rotate Slider:** A checkbox that is checked.
- Slider sliding speed:** A text input field containing '5,000'.
- Collections of category:** A container showing four category tags: 'Devices / Mobile', 'Devices / Headsets', 'Mobiles / Apple', and 'Mobiles / Samsung'. Each tag has a close button (X).

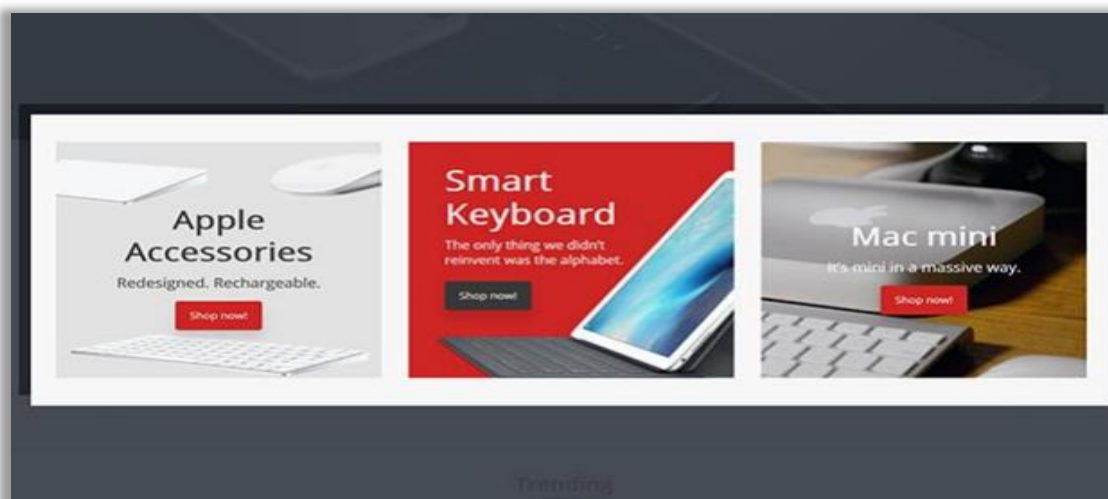

Note: To manage the Slider Configurations user must have the 'Editor and Designer' access rights.

Configuring Collection Snippet

- Go to **Website -> Edit -> Insert Blocks -> Collection**. Drag and drop Collection Snippet on the page where you want it.
- Click on '**Customize**' to customize Style, Background and Color of the snippet. You can Move, Copy and Delete the snippet from here. You can also resize the snippet as per the need.
- You can customize every block of the snippet. You can customize single collection block as well as combined Collection block. You can click on any image to change the image or remove the image. Along with image you can also add Text, Document, Pictogram and Video to the snippet.
- You can set button for your customer to navigate him / her directly to the collection Page.

- Collection Snippet will allow you to display your most fascinating collection of products to your customers. You can manipulate block images along with text of the block. You can also set navigation buttons on the snippet block as per the need and navigate customer to specific links.

Configuring Brand Slider Snippet

- Go to **Website -> Edit -> Insert Blocks -> Features**. Drag and drop Brand Snippet on the page where you want it.
- Set Total Counts & Label for the Brand Slider before adding it to the Website.

The image shows a configuration dialog box titled "Brands Slider Configuration". It has two input fields: "Total Count" with the placeholder text "Enter Count", and "Label" with the placeholder text "Enter Label (for e.g: Our Brands)". At the bottom, there are two buttons: "Cancel" and "Apply".

- With the Brand Slider Snippet display all the highly engaging brands from your store. Customize content and images for exclusive look & feel of the banner.
- Display all the high-profile brands' products that your store endorses. Customer can directly shop for products of the presented brands from the brand slider.

Adding Brands to Brand Snippet

- Go to **Sales -> Slider Configuration -> Product Brands**. Click on **'Create'** button to create a new Brand for the Shop.
- Now Add Brand Name, Brand Logo, Brand Cover, Associated Brand Products and Brand Description saving the brand.

Brand Name
Apple Inc.

Brand Cover

Description
Apple Inc. is an American multinational technology company headquartered in Cupertino, California that designs, develops, and sells consumer electronics, computer software, and online services.

- To associate Brand to the Products, select any Product and add Brand Name to associate it.

The screenshot shows the 'Products / New' form in Odoo. At the top, there are 'Save' and 'Discard' buttons. Below them, a product image placeholder is shown next to the 'Product Name' field, which contains 'iPhone 7'. To the right of the name, there are status indicators: 'Unpublished On Website', '\$ 0 Sales', and 'Active'. Below the product name, the 'Brand' field is highlighted with a red box and contains 'Apple Inc.'. Below the brand field, there are three checkboxes: 'Can be Sold' (checked), 'Can be Purchased' (checked), and 'Add Multiple Images?' (unchecked). At the bottom, there are tabs for 'General Information', 'Sales', 'Invoicing', and 'Notes'. The 'General Information' tab is active, showing fields for 'Product Type' (Consumable), 'Category' (All), 'Internal Reference', and 'Barcode'. To the right of these fields, there are input fields for 'Sales Price' (\$650.00) and 'Cost' (\$150.00).

Configuring Single Banner Without slider

- Go to **Website -> Edit -> Insert Blocks -> Features**. Drag and drop Single Banner without Slider Snippet on the page where you want it.
- Click on Image, Text and Button to change it as per your likings.

Configuring Testimonial Snippet

- Go to **Website -> Edit -> Insert Blocks -> Testimonials**. Drag and drop the snippet on the page where you want it.
- Click on **'Customize'** to customize Style, Background and Color of the snippet. You can Move, Copy and Delete the snippet from here. You can also resize the snippet as per the need. You can customize client area background as well as whole snippet background. You can also add multiple slides to the snippet to show numerous testimonials.
- You can customize every block of the snippet. You can customize single testimonial block as well as combined testimonial blocks. You can click on any image to change the image or remove the image. Along with image you can also add Text, Document, Pictogram and Video to the snippet.

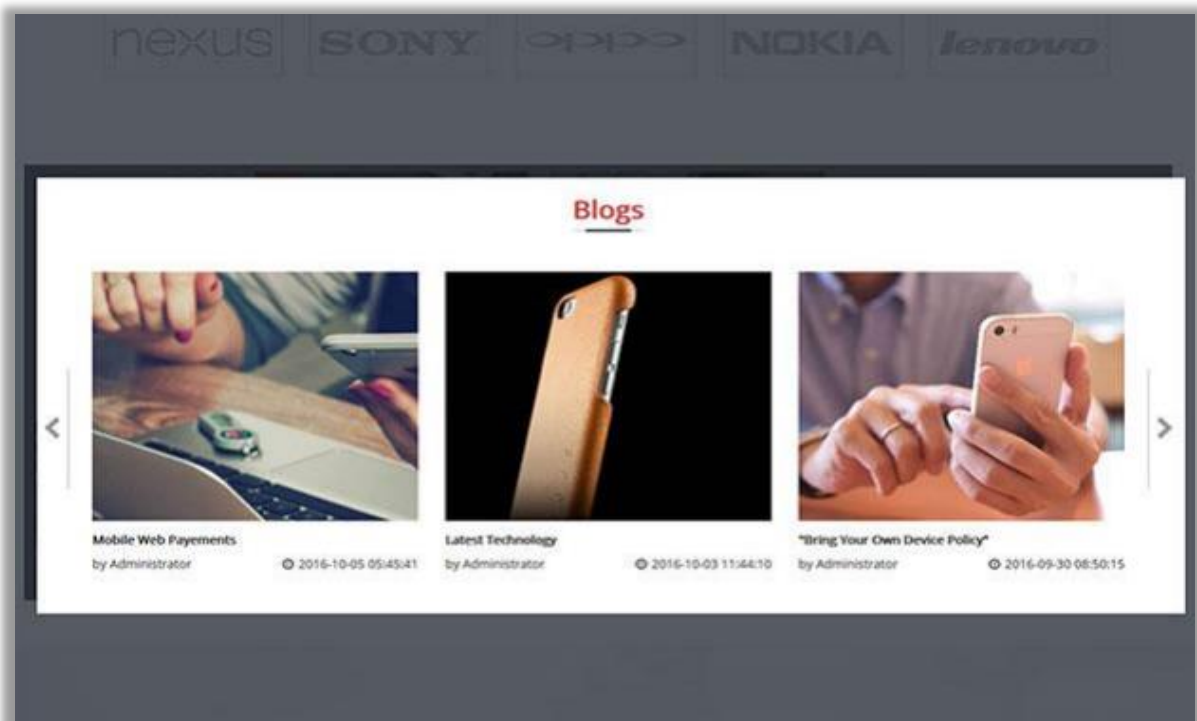

Configuring Blog Slider Snippet

- Go to **Website -> Edit -> Insert Blocks -> Blog Slider**. Drag and drop the snippet on the page where you want it.
- Select the type of Blog which you want to display from the menu.
- Click on '**Customize**' to customize Style, Background and Color of the snippet. You can Move, Copy and Delete the snippet from here. You can also resize the snippet as per the need.

The screenshot shows a 'Blog Slider Configuration' dialog box. It has a 'Type' label followed by a dropdown menu currently set to 'Blogs'. At the bottom right, there are two buttons: 'Cancel' (blue) and 'Apply' (red).

- Display the latest blogs posted by your site or related to your products with Blog Slider Snippet provided by the theme.

Adding Blogs to the Snippet

- Go to **Website > Blog -> Blog Slider Configuration**. Click on **'Create'** button to create a new Blog category.
- Set following attributes to display Blog Slider on website:
 - **Slider Name:** Enter Slider Name
 - **Slider Label:** Set the label for the slider
 - **Products Collection:** Set the products to be displayed in the slider.
 - **Collection of Blog Posts:** Add the Blogs which are needed to be added in the collection.

- More View Exclude:** Checkmark icon, which is checked.

At the bottom of the modal, there are three buttons: "Save & Close" (purple), "Save & New" (purple), and "Discard" (white with grey border).

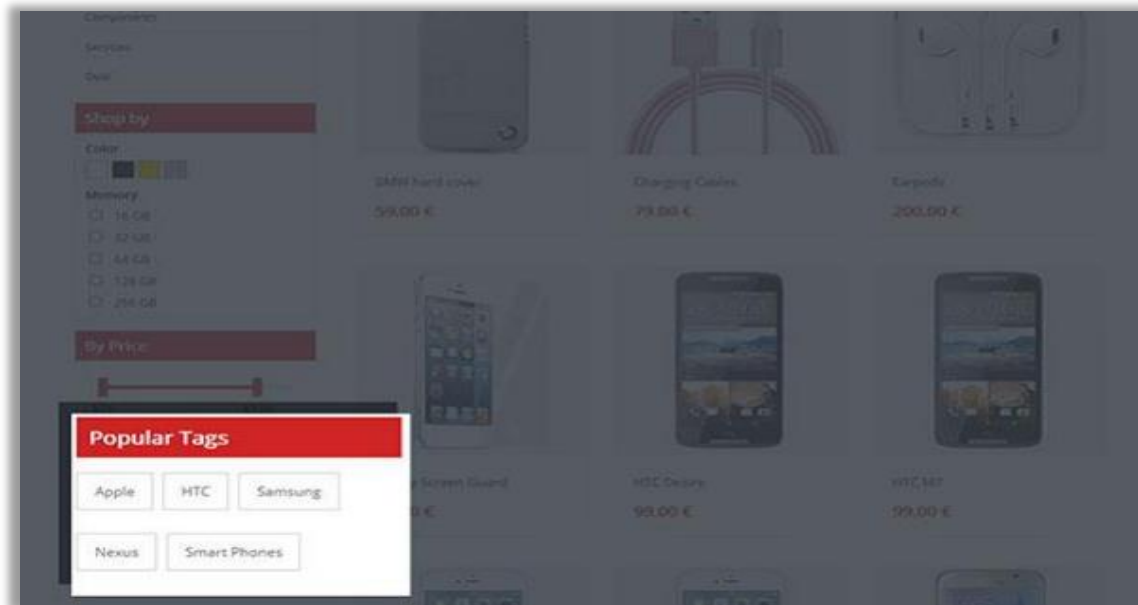

Panel Options

- Go to **Website -> Configuration -> Settings -> Multiple Product Image**. Now you can view following Multiple Product Image Settings:
 - **Slider Effect:** Select this option to enable slider effects.
 - **Thumbnail Panel Position:** This drop down allows admin to select Thumbnail panel position from Left, Right or Bottom.
 - **Play Interval of Slideshow:** This allows admin to manage interval between two images in slideshow.
 - **Enable Text Panel:** Select this option to show text along with images in panel.
 - **Thumbnail Overlay Effect:** This option allows admin to choose thumbnail overlay effects from Default, B/W, Sepia or Blur.
 - **Change Thumbnail Size:** To change thumbnail height and width, enable this option.

The screenshot shows the 'Settings' interface of the Odoo Mobicraft Theme. On the left is a dark sidebar with icons and labels for 'Sales', 'Website' (which is highlighted), 'Invoicing', 'Email Marketing', 'Events', 'Employees', and 'General Settings'. The main area is titled 'Settings' with a 'Search...' bar and 'Save'/'Discard' buttons. Below this, the 'Multiple Product Image' settings are displayed. These include: 'Slider effects' (checked), 'Enable the text panel' (checked), 'Thumbnails panel position' (set to 'Left'), 'Play interval of slideshow' (set to '5000'), 'Thumbnail overlay effects' (set to 'Default'), and 'Change thumbnail size' (checked). Under 'Change thumbnail size', there are input fields for 'Thumb height' (set to '50') and 'Thumb width' (set to '88').

Product Sorting with Product Tags

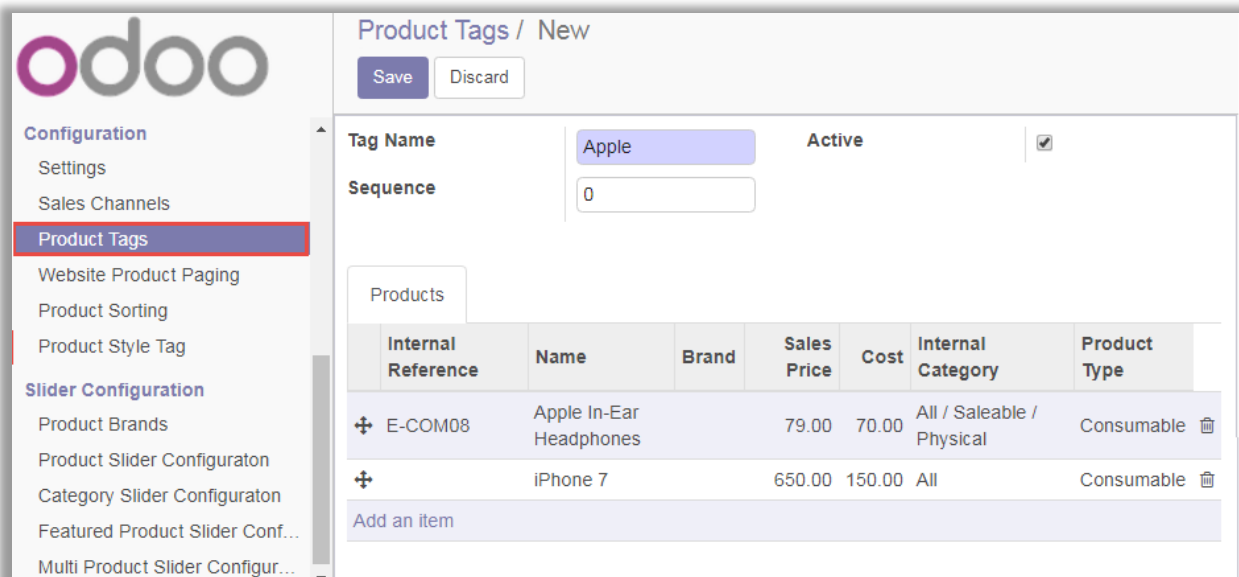

- Customer can sort the products on Product Tags provided by admin for Sorting.

Note: Both the Filters, Price Slider & Popular Tags will work in combination.

Product Tag Configurations

- Go to **Sales -> Product Tags**. In this you will find **'Create'** Button. Click on it to create a New Product Tag. These Tags will be used for Product sorting based on Tags in Shop.
- Now Add Tag Name, Status and Sequence for the Tag.
- To add the Products for the Tags, click on **'Add an Item'** and add needed items.

Note: To manage the Product Tag Configurations user must have the **'Editor and Designer'** access rights.

Product Sorting Configurations

- Go to **Sales -> Product Sorting**. In this you will find **'Create'** Button. Click on it to create a New Product Sorting Option. These Sorting options will be used for Product sorting based on provided criteria in Shop.
- Set a Criteria Name, Order By Option and Product Attribute on which sorting is required to be done.
